

## Equipment Rental Protection Plan (ERPP) Protects Your Investment

Burton NDT ERPP agreement offers you and your company financial protection should an instrument get stolen or is involved in any incidental or accidental damage during the rental period.

The ERPP is not an insurance policy, but a method by which your financial obligation to repair or replace an instrument is greatly reduced. This is an added benefit that Burton NDT Rentals offers to our customers to ensure peace of mind when on the job site.

If you do not have your own insurance, we are happy to provide coverage via **ERPP (Equipment Rental Protection Plan)**

### What does it provide?

#### Damage Protection

- 2- levels for 13% you receive (50% coverage) and for 16% of rental you receive (75% coverage)
- ERPP provides coverage for repairs due to accidental or incidental damage to equipment.
- Damage resulting from abuse or **misuse is not covered** - abuse or misuse is defined as equipment used in an application it was not designed for or an application that exceeds the manufacturers' specifications. In this event manufacturers list price will be charged to the customer.

#### Rental Liability

- Significantly reduces your liability for damaged or stolen equipment.
- Avoid claims against your insurance.
- Equipment replacement cost can sometimes fall under your company's insurance deductible and repair cost most likely will. The ERPP gives you coverage when your business insurance leaves you exposed.

#### Theft Protection

- You are only responsible for a percentage of the replacement cost depending on protection level selected.
- A police report must be filed, and notification given to Burton NDT Rentals within **48 hrs.** of the customer being made aware of stolen equipment. If a police report is not provided, the customer is fully liable for the entire cost of replacement.
- In the event the stolen equipment is recovered, Burton NDT Rentals will retain ownership.
