

WELDSCAN

Cost Effective Phased Array/TOFD

The WeldScan is the best and most cost-effective way to perform phased array, TOFD and corrosion inspections. The WeldScan is compact, lightweight, has soft-contact magnetic wheels and our exclusive IP68 waterproof RME encoder. The RME Encoder is so robust, we offer it with our industry-leading lifetime warranty.

- Circumferential & Axial Scanning
- IP68 Waterproof encoder w/ lifetime warranty
- Detachable encoder cable (offered in various lengths)
- Soft surface magnetic wheels
- Quick & easy configuration changes
- 4 x Stage-1 linear gimbles for perfect probe alignment
