

- **9" Clear & Reliable Screen:** You are a master plumber who needs the best equipment, and we have it right here for you. This camera is wonderful for checking the condition of sewer lines. The sewer camera features a 9-inch 720p LCD screen, showing crystal clear and vivid images. Get ready to see the underlying cause behind repeated problems!
- **Light up Dark Spaces:** 1-megapixel camera and max 130° inspection angle easily make it visible to see where it is hard to reach. The IP68 camera adopts a 303 stainless steel housing and a sapphire lens to protect it from crashes and corrosion. 12 adjustable LED lights in the camera provide excellent illumination.
- **Crossing the Long Pipe:** The 164 ft/50 m semi-rigid cable can be fed through pipes or gaps easily. You can effortlessly estimate the distance of any problem thanks to length markings. Besides, the inspection camera kit comes with a handy cable reel for cable organization and carrying. Never feel stick and get the job done right!
- **Record & Analyze Every Detail:** Get ready to relive and analyze every project! The pipeline inspection camera comes with a DVR and photo-taking functions. Once you press REC/-, it will start to record. A 16 G SD card allows for transferring images and videos to the computer for future reference and analysis. A 4500mAh Lithium battery supports working continuously for 6 hours.
- **Bring It on the Go:** The professional plumbing camera will exceed your expectations for inspections in sewers, wastewater systems, stormwater systems, drains, ducts, etc. It is an outstanding helper for plumbers, contractors, inspectors, engineers, and municipal workers.
